

Sigita Žaromskienė

Junior Front End Developer

I'm a friendly and dependable person who loves building cool stuff on the internet. I switched my career two years ago and taught myself coding. I really want to be part of a high-achieving team where I can use my different skills and dedication to reach big goals. I'm passionate about creating awesome web experiences and turning ideas into reality with code.

Education

2010-2014
Bachelor of Law
Mykolas Romeris University

2023
Front End Development Course
Baltic Institute of Technology

Soft Skills

- Communication and Collaboration
- Continuous Learning and Improvement
- Attention to Detail
- Self-Motivation and Initiative
- Adaptability and Flexibility
- Time Management and Prioritization

Tech Skills

- HTML
- CSS/SCSS (BEM)
- JavaScript
- React/React Router
- Redux/Redux Toolkit
- Responsive Design
- Git/Github
- Testing (Jest) and Debugging
- API Integration
- Node.js

Projects

11/2023-12/2023

Grocery Shop React Project

Description: Grocery Haven: A User-Friendly Platform for Browsing, Shopping, and Placing Orders for Quality Grocery Items.

Main features:

- **React.js:** Used for building the user interface, offering a component-based approach.
- **React Router:** Handles navigation within the application, allowing for different views based on routes.
- **SCSS with BEM Methodology:** Style implementation for maintainability, readability, and scalability.
- **Redux with Redux Toolkit:** State management tool for predictable and centralized state handling.
- **Media Queries for Responsiveness:** Ensures the application's responsiveness up to a screen width of 500px.
- **Login, Logout, and Registration:** Enables users to create accounts, log in, and log out.
- **MariaDB:** Relational database management system used for storing application data.
- **Node.js with Express:** Node.js for server-side runtime, and Express.js as the backend web application framework.

10/2023

Fun API Integration Project

Description: Fun and interactive application built with React and Redux Toolkit, integrating various public APIs to provide entertaining features.

Main features:

- **React and JavaScript:** Leveraging React, a JavaScript library for creating interactive user interfaces, along with JavaScript for functionality.
- **Redux Toolkit:** Utilizes Redux Toolkit, offering a comprehensive set of tools to streamline the development process using Redux.
- **Redux Thunks:** Implements Redux Thunks middleware, enabling the handling of asynchronous logic within Redux.
- **SCSS:** Employs SCSS, a CSS preprocessor, to efficiently manage and style the user interface.
- **Multiple APIs usage:** including Cat Facts for random interesting facts about cats, Funny Dog Pictures for amusing dog images, Activity API for daily activity suggestions, and Meme API for daily humorous memes.
- **Axios:** employed as the HTTP client library in this project to make requests and handle data fetching operations from external APIs or endpoints.
